

HIDR API TESTING REPORT

Project: **hidr_project**
Application: HIDR Website (hidr.com.np)
Testing Type: API Testing
Test Data Source: hidr_project Google Sheet export
Report Date: 20 August 2026

1. Executive Summary

The HIDR API test suite contains 286 recorded test cases across 7 functional areas. All 286 are marked PASS, with 0 failures, 0 blocked, and 0 not executed. Pass rate: 100.00%.

2. Overall Test Execution Summary

Metric	Count	Percentage
Total	286	100.00%
Passed	286	100.00%
Failed	0	0.00%
Blocked	0	0.00%
Not Executed	0	0.00%

3. Module Summary

Module	Cases	Passed	Failed	Pass %
Accounts	56	56	0	100.00%
Contact	56	56	0	100.00%
Gallery	39	39	0	100.00%
Pages	32	32	0	100.00%
Projects	36	36	0	100.00%
Schema	23	23	0	100.00%
Publications	44	44	0	100.00%

4. Priority Distribution

Priority	Cases	Percentage
High	171	59.79%
Medium	101	35.31%
Low	14	4.90%

5. HTTP Method Distribution

Method	Cases	Percentage
GET	140	48.95%
POST	63	22.03%
PUT	27	9.44%
DELETE	26	9.09%

Method	Cases	Percentage
PATCH	22	7.69%
OPTIONS	3	1.05%
All	3	1.05%
HEAD	1	0.35%
TRACE	1	0.35%

6. Key Observations

- All 286 recorded test cases have a PASS status in the supplied spreadsheet.
- Authentication and authorization scenarios are heavily represented, which is appropriate for protected API endpoints.
- The suite covers multiple HTTP methods and both collection and detail endpoints.
- The source data contains a broad mix of positive, negative, validation, security, performance, boundary, and functional scenarios.
- The report reflects the spreadsheet exactly for execution status; it does not infer unrecorded API behavior.

7. Recommendations

- Continue API regression after backend deployments.
- Add automated schema/contract validation.
- Standardize response-time thresholds.
- Expand role-based authorization and rate-limit testing.
- Track any future failures as Jira defects with full request/response evidence.

8. Final QA Conclusion

The supplied hydr_project dataset records 286/286 passing test cases (100.00%), with no recorded failures, blocked cases, or not-executed cases. The tested scope therefore meets the expected results captured in the spreadsheet.
